

CE  
ISO9001

Operation  
distance : 100m

Receiver  
with 4 LED

# F21 E1B RADIO REMOTE

## TECHNICAL DETAILS

### Transmitter

### Receiver

Operation Distance	100M	110dBm 100M
Frequency	FM 433MHz(20CH); FM 868MHz(20CH)	FM433MHz(20CH); FM868MHz(20CH)
Out put Power	< 10mw	-
Antenna	Internal Type	Internal Type
Temperature	0C~+70C (no battery inside)	-10C~+70C
Power Supply	1.5v(AA)*4 Nos	AC12V/AC24V/AC48V/AC110V/AC220V/AC440V, 50/6Hz
Enclosure	Ip64	Ip65
Consumption	<17mA(standby: <20mA)	<12W
Address Code	4.2 billions sets	4.2 billions sets
Weight	235g (excluding batteries)	700g (excluding batteries)

## Features

- Advance program design, Quick & good performance on movements.
- PA transmitter housing, water/shock/dust proof
- Single-row button transmitter, compact and lighter design, ensure safe & convenient operation.
- Random security code up to 4.2 billions sets. Each transmitter has own unique ID code.
- Receiver with 4-LED, quick, simple Judgement for operation status & after service.

## Power on Steps

- Power-on receiver
- Switch the power switch to ON, and turn on the mushroom.
- Press any button and release, now is ready to operate (now receiver powder LED light is green)

## Power off Steps

- Push down the mushroom.
- Switch Off transmitter power to cut Off the power.
